

SEA INSIDE

"What is healing? Remembering who we are. We temporarily forgot who we are." Eric Pearl

NEWS

Energy Healing is done in addition to Body Code to provide a burst of energy after the emotions and alignment are balanced.

TESTIMONIAL

I contemplated suicide everyday and it was almost non stop. I saw others suffer as I suffered but couldn't see a solution that resonated true in every fiber of my being. It's like, imagine a chair with 3 legs in a wobbly condition, the 4th one is broken. You know it's on it's way out but you want to make it work so you come up with all sorts of ways to hang on while having carpenters work on it, but nothing works. The chair itself starts begging to be thrown out. You're left with 2 choices: Give up or give it your all for the last time. That's kind of where I was at before I met you. Now the chair is good. Just needs a few tweaks cuz it's had a bumpy ride. But instead of yelling at it that it's useless, I'm telling it, it's better and is getting better and will get better. Now it's getting polished and upgraded. Strengthened and the patches are being removed so that substance can be put in its place.

Body Code and Reconnective Healing

My process is two-fold, investigating through the **Body Code and the Emotion Code**, I explore with you to acknowledge and remove trapped emotions and misalignments that you have chosen (consciously, unconsciously or symbolically) to store in your body as a way to avoid having to face the pains of living. This process releases, one by one, the stored negative history of your life. It is done with grace and ease and has no pain associated with its acknowledgement, in contrast to other modalities such as the process of psychotherapy.

In addition to this treatment, I add work on my clients outside of the session to create energy, light and information transfer which increases the overall energy of your life force so that your higher self can balance the energy leaks and injuries endured by your being. You can experience joy, while creating a more defined sense of self-responsibility, an ease and respect for yourself and for others. This is a different modality to Body Code but work in

"It's hard to pinpoint exactly what it is about Sea Inside that makes it so special. Not only is Diane warm and kind, but the session was so comfortable. I didn't feel judged or nervous. Usually I don't believe in this sort of thing, but after the emotion releasing session, I had a sense of calm I'd never experienced before. 100% impressed and will be doing more sessions in the future."

Jeff T.

harmony with it. It takes 3 treatments a week apart.

You have invented, created and made who you are. This is what you are and your concept of self is what you will continue to become. Whether rags to riches and riches to rags, it is only a question of your intent. In order to create a higher, better sense of self, another domain of knowing, communicating and being, the act of calling forward and generating your intent only happens when you have the clarity of mind and energy to do so.

Through these two harmonising modalities, the knowledge that is within you is given power to become. It literally can bring what you want into being, allowing you to clearly know yourself. My patients have become highly energised and awakened people who just weeks before were ill and exhausted, some unable to get out of bed, others unable to talk to others with openness and humanity and/or had serious physical/mental issues. The changes are miraculous.

I specialise in releasing pain, morning sickness (mostly instant relief), relationship issues, mental health issues, success blocks, weight issues, chronic fatigue, ADHD, etc. I especially love to treat animals from cats to elephants and everything in-between. I have had such fascinating experiences in this work, watching people and animals do better, feel better and have more energy. The overall well-being people experience has become such a welcomed inspiration to me. I feel excitement about the future of this modality and such gratitude for being able to practice in this field.
